

Information at your fingertips

Access Pulse EHR on the GO!

Pulse Mobile 2.0 is a physician-focused app for iOS smart phones. It offers access to our certified EHR solution at the touch of a button. Available to current and prospective clients, Pulse Mobile 2.0 enhances the ease and efficiency of providing high quality care to patients. Users will be equipped with their version of a "mobile office," which will ultimately save time and limited resources.

Pulse Mobile 2.0 was developed to create a simple and intuitive workflow to access patient records and scheduling information.

Key Features

- + View Daily Appointments
- + Review Encounter Notes
- + Current Medications & Allergies
- + Active Problems
- + View Lab Results & Immunizations
- + Capture Patient Charges
- + Create & Complete Tasks

Note: To protect the security of patient and practice information, only licensed Pulse users can utilize the app with specific login credentials. Information in Pulse Mobile 2.0 does not save to mobile devices and is erased upon closure of the app. Pulse Mobile 2.0 contains HIPAA Compliant Security.
